INDEPENDENT AUDITOR'S REPORT

The Shareholder
Seamec International FZE
United Arab Emirates

Report on the audit of the financial statements of Seamec International FZE for the year ended March 31, 2024

Opinion

We have audited the accompanying financial statements of Seamec International FZE, Dubai, UAE ("the Establishment"), which comprises the statement of financial position as at March 31, 2024, statement of comprehensive income, statement of changes in equity and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Establishment as at March 31, 2024 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) for Small and Medium Sized Entities.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISA's). Our responsibilities under those standards are further described in the auditors responsibilities for the audit of the financial statements of our report. We are independent of the Establishment in accordance with the 'International Ethics Board for Accountants' Code of Ethics for Professional Accountants (the "IESBA Code") together with the ethical requirements that are relevant to our audit of the financial statements in the United Arab Emirates, and we have fulfilled our other Ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Term Loans obtained from Bank of Baroda have been fully repaid through Overdraft Facility.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with IFRSs and in compliance with the applicable provisions of Dubai Airport Free Zone Authority (DAFZA), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from materal misstatement, whether due to fraud or error. In preparing the financial statements, the management is responsible for assessing the Establishment's ability to continue as a going concern, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Establishment or to cease operations, or has no realistic alternative but to do so.

Auditing Accounting Consulting
Corporate Services Taxation

Seamec International FZE

INDEPENDENT AUDITOR'S REPORT

Those charged with governance are responsible for overseeing the Establishment's financial reporting process.

Auditors responsibilities for the audit of the financial statements

Objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA's will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISA's, we exercise professional judgement and maintain professional skepticism through out the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Establishment's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Establishment's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's; report. However, future events or conditions may cause the Establishment to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Seamec International FZE

INDEPENDENT AUDITOR'S REPORT

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

We have obtained all the information and explanations which were necessary for the purpose of our audit and, to the best of our knowledge and belief, no violations of the Implementing Regulations issued there under by the Dubai Airport Free Zone Authority (DAFZA) came to our attention which would have had a material effect on the Establishment's financial position.

Rajiv Goel Director May 25, 2024

These financial statements have been prepared for the year ended March 31, 2024

1. LEGAL STATUS, ACTIVITIES AND MANAGEMENT

1.1 Legal status

Seamec International FZE was registered on 14 March 2010 as a Free Zone Establishment with limited liability under license No. 1884 issued by Dubai Airport Free Zone Authority, Government of Dubai. The registered office of the Establishment is located in the Emirate of Dubai. The Establishment is a wholly owned subsidiary of Seamec Limited (the "Parent Establishment") registered in Mumbai, India. The ultimate parent Entity is Hal Offshore Limited (the Ultimate Parent Company), registered in New Delhi, India.

As per the Memorandum of Association: the issued, subscribed and paid up capital of the Establishment as on March 31, 2024 is AED 6,000,000 (AED Six Million Only) (Equivalent USD 1,634,878) divided into 6 shares of AED 1,000,000 each & as on March 31, 2023 is AED 6,000,000 (AED Six Million Only) (Equivalent USD 1,634,878) divided into 6 shares of AED 1,000,000 each held by Seamac Limited, India.

1.2 Activities

The principal activities of the Establishment is "Ship Charter, Ship Management & Operation, Shipping Lines of Freight & Passengers Transportation, Onshore & Offshore Oil & gas field services".

2 MATERIAL ACCOUNTING POLICIES

2.1 Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards promulgated by the International Accounting Standards Board (IASB) and interpretations issued by the IFRSs Interpretations Committee (IFRS IC).

The financial statements are prepared under the historical cost convention.

2.2 Adoption of new and revised international financial reporting standards (IFRS)

 New Standards, Improvements, Interpretations and Amendments issued and effective for current year.

IFRS 17 Insurance Contracts (including the June 2020 and December 2021 Amendments to IFRS 17)

The Company has adopted IFRS 17 and the related amendments for the first time in the current year. IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 Insurance Contracts. IFRS 17 outlines a general model, which is modified for insurance contracts with direct participation features, described as the variable fee approach. The general model is simplified if certain criteria are met by measuring the liability for remaining coverage using the premium allocation approach. The general model uses current assumptions to estimate the amount, timing and uncertainty of future cash flows and it explicitly measures the cost of that uncertainty. It takes into account market interest rates and the impact of policyholders' options and guarantees.

Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors—Definition of Accounting Estimates

The Company has adopted the amendments to IAS 8 for the first time in the current year. The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". The definition of a change in accounting estimates was deleted

Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements—Disclosure of Accounting Policies

The Company has adopted the amendments to IAS 1 for the first time in the current year. The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material. The IASB has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2.

Amendments to IAS 12 Income Taxes—Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The Company has adopted the amendments to IAS 12 for the first time in the current year. The amendments introduce a further exception from the initial recognition exemption. Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences. Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting profit nor taxable profit. Following the amendments to IAS 12, an entity is required to recognise the related deferred tax asset and liability, with the recognition of any deferred tax asset being subject to the recoverability criteria in IAS 12.

Amendments to IAS 12 Income Taxes—International Tax Reform Pillar—Two Model Rules

The Company has adopted the amendments to IAS 12 for the first time in the current year. The IASB amends the scope of IAS 12 to clarify that the Standard applies to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the OECD, including tax law that implements qualified domestic minimum top-up taxes described in those rule

The amendments introduce a temporary exception to the accounting requirements for deferred taxes in IAS 12, so that an entity would neither recognise nor disclose information about deferred tax assets and liabilities related to Pillar Two income taxes. Following the amendments, the Company is required to disclose that it has applied the exception and to disclose separately its current tax expense (income) related to Pillar Two income taxes.

(ii) New Standards, Improvements, Interpretations and Amendments issued but not yet effective.

Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture. The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted. The directors of the parent company anticipate that the application of these amendments may have an impact on the Company's consolidated financial statements in future periods should such transactions arise.

Amendments to IAS 1 Presentation of Financial Statements—Classification of Liabilities as Current or Non-current

The amendments to IAS 1 published in January 2020 affect only the presentation of liabilities as current or noncurrent in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items. The amendments clarify that the classification of liabilities as current or noncurrent is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make

clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services. The amendments are applied retrospectively for annual periods beginning on or after 1 January 2024, with early application permitted. The IASB has aligned the effective date with the 2022 amendments to IAS 1. If an entity applies the 2020 amendments for an earlier period, it is also required to apply the 2022 amendments early. The directors of the parent company anticipate that the application of these amendments may have an impact on the Company's consolidated financial statements in future periods.

2.3 Use of estimates and judgements

The preparation of the financial statements in conformity with IFRS requires management to make estimates and assumptions that may affect the reported amount of assets and liabilities, revenues, expenses, disclosure of contingent liabilities and the resultant provisions and fair values. Such estimates are necessarily based on assumptions about several factors and actual results may differ from reported amounts.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

In particular, information about significant areas of estimation, uncertainty, and critical judgements in applying accounting policies (that have the most significant effect on the amount recognized in the financial statements) are discussed in remaining notes.

2.4 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Establishment and the revenue can be reliably measured. Revenue is measured at the fair value of consideration received or receivable, excluding discounts, rebates, and sales taxes or duty. Revenue is recognized. Revenue is recognized when the performance obligations are met as per the requirement of IFRS 15. Revenue from contract with customers is recognized based on the application of a principle-based 'five step' model:

- a. Identification of the contract with customers
- Identification of performance obligations(PO)in the contract;
- c. Determination of the transaction price (TP);
- d. Allocation of the Transaction Price to the PO in the contract and
- e. Recognition of the revenue when (or as)an entity satisfies a PO

Revenue flowing from multiple services are categorized on the basis of timings of services provided and performance obligation so satisfied i.e. (a) At a point in time and (b) Over the period of time and is recognised to the extent that it is probable that the economic benefits will flow to the Entity and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, excluding any variable consideration unless it is highly probable that subsequent change in estimate would not result in reversal of revenue. Following are the major types of services provided along with their performance obligation satisfaction criteria:

Charter hire revenue

Charter hire revenues represent time charters and are recorded over the term of the charter as the services are provided. Revenue in progress at year end is calculated using the daily charter hire rate multiplied by the number of voyage days on-hire through year end. Respective vessel operating expenses are accounted for on an accrual basis.

Interest income

Interest income is recognised using the effective interest method.

2.5 Property and equipment

Property and equipment is stated at cost less accumulated depreciation and impairment losses, if any.

Depreciation is calculated on a straight line basis over the estimated useful lives of the assets.

Asset	Useful life of asset
Vessel	25 years
Vehicle	4 years
Furniture and fixtures	4 years
Computer and office equipment	4 years
Drydock expenditure	5 Years
Water treatment system	12.40 Years

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount, being the higher of their fair value less costs to sell and their value in use.

Expenditure incurred to replace a component of an item of property and equipment that is accounted for separately is capitalized and the carrying amount of the component that is replaced is written off. Other subsequent expenditure is capitalized only when it increases future economic benefits of the related item of property and equipment. All other expenditure is recognized in the statement of comprehensive income as the expense is incurred.

An item of property and equipment is derecognized upon disposal or when no future benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and carrying amount of the asset) is included in the statement of comprehensive income in the period the asset is derecognized.

The asset's residual values, useful lives and methods of depreciation are reviewed at each financial period end, and adjusted prospectively, if appropriate.

The cost of docking the vessel for maintenance and overhaul is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Establishment, and its cost can be measured reliably.

Costs incurred for preparation of vessel to go for Dry Docking is recognised as Capital Work In Progress and is subsequently capitalised when vessel goes for Dry Dock.

2.6 Non-current assets held for sale and discontinued operations

Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying value and fair value less costs to sell. Assets and disposal groups are classified as held for sale if their carrying value will be recovered through a sale transaction rather than through continuing use. This condition is only met when the sale is highly probable and the asset, or disposal group, is available for immediate sale in its present condition and is marketed for sale at a price that is reasonable in relation to its current fair value. The Company must also be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Where a disposal group represents a separate major line of business or geographical area of operations, or is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations, then it is treated as a discontinued operation. The post-tax profit or loss of the discontinued operation together with the gain or loss recognised on its disposal are disclosed as a single amount in the statement of profit and loss, with all prior periods being presented on this basis.

2.7 Investment in subsidiary

Investment where the Establishment holds more than 50% of the share capital of the investee and/or has the power to govern the financial and operating policies of the investee Company, so as to obtain benefits from its activities, are treated as subsidiary companies.

The Establishment's investment in subsidiary are accounted for using the equity method. Under the equity method, the investment in the subsidiary is initially recognised at cost are adjusted by incorporating the financial statement of the subsidiary Company as per the IFRS.

2.8 Accounts receivable

Accounts receivable are stated at original invoice amount less a provision for any uncollectible amounts. An estimate credit loss calculated using the simplified approach as per the requirements of IFRS 9. Bad debts are written off when there is no possibility of recovery.

2.9 Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash in hand, bank balances, and short-term deposits with an original maturity of three months or less.

2.10 Accounts payable and accruals

Liabilities are recognized for amounts to be paid in the future for goods or services received, whether billed by the supplier or not.

2.11 Provisions

Provisions are recognized when the Establishment has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Establishment expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement.

2.12 Employees' end of service benefits

The Establishment provides end of service benefits to its expatriate employees. The entitlement to these benefits is based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

2.13 Financial assets

Initial recognition and subsequent measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Establishment's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Establishment has applied the practical expedient, the Establishment initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Establishment has applied the practical expedient are measured at the transaction price determined under IFRS 15.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- a). Financial assets at amortized cost (debt instruments);
- b). Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments);
- c). Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments) ;and
- d). Financial assets at fair value through profit or loss.

(a) Financial assets at fair value through OCI (debt instruments)

The Establishment measures debt instruments at fair value through OCI if both of the following conditions are met:

a). The financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling; and

- b). The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- c). The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The Establishment's debt instruments at fair value through OCI includes investments in quoted debt instruments included under other non-current financial assets.

(b) Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Establishment can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under IAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the statement of profit or loss when the right of payment has been established, except when the Establishment benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

(c) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognized in the statement of profit or loss.

(d) Financial assets at amortized cost (debt instruments)

The Establishment measures financial assets at amortized cost if both of the following conditions are met:

a). The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and

b). The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

(e) Derecognition of financial assets

A financial asset is primarily derecognized when:

I). The rights to receive cash flows from the asset have expired; Or

II). The Establishment has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Establishment has transferred substantially all the risks and rewards of the asset, or (b) the Establishment has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Establishment has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Establishment continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Establishment also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Establishment has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Establishment could be required to repay.

(f) Impairment of financial assets

The Establishment recognizes an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Establishment expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade receivables and contract assets, the Establishment applies a simplified approach in calculating ECLs. Therefore, the Establishment does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Establishment has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For debt instruments at fair value through OCI, the Establishment applies the low credit risk simplification. At every reporting date, the Establishment evaluates whether the debt instrument is considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Establishment reassesses the internal credit rating of the debt instrument.

2.14 Financial liabilities

(a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Establishment's financial liabilities include trade and other payables, bank overdrafts.

(b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Establishment that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Establishment has not designated any financial liability as at fair value through profit or loss.

Loans and borrowings

This is the category most relevant to the Establishment. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

(c) Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

2.15 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

2.16 Value added tax

Value Added Tax (VAT) asset/ liability is recognized in the books on the basis of regulations defined by Federal Tax Authority (FTA).

Expenses and assets are recognized net of the amount of value added tax, except:

- i. When the value added tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the value added tax is recognized as part of the cost of acquisition of the asset or as part of the expense item, as applicable;
- ii. When receivables and payables are stated with the amount of value added tax included.

The net amount of value added tax recoverable from, or payable to, the taxation authority is included as part of other receivables or other payables in the financial statements.

2.17 Share capital

Proceeds from issuance of ordinary shares are recognized as share capital in equity. Incremental costs directly attributable to the issuance of ordinary shares are deducted against share capital.

2.18 Contingencies

A contingent liability is:

- (a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Establishment; or
- (b) a present obligation that arises from past events but is not recognized because:
- (i) It is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
- (ii) The amount of the obligation cannot be measured with sufficient reliability.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Establishment.

Contingent liabilities and assets are not recognized on the balance sheet of the Establishment, except for contingent liabilities assumed in a business combination that are present obligations and which the fair values can be reliably determined.

The preparation of the Establishment's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the end of each reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Notes to the financial statements for the year ended March 31, 2024

Due to related party Seamec Limited for purchase of vessel Gallent of USD 8.48 million during the year and interest @ 9% payable on payable amount

23. FINANCIAL INSTRUMENTS

The management believes that the fair value of the financial assets and liabilities are not significantly different from their carrying amounts at reporting date.

The management conducts and operates the business in a prudent manner, taking into account the significant risks to which the business is or could be exposed. The primary risks to which the business is exposed, comprise credit risks, liquidity risks and market risks (including currency risks, cash flow interest rate risks and fair value interest rate risks).

a. Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognized assets and liabilities are denominated in a currency that is not the Establishment's functional currency. The Establishment does not have any significant currency risk as the Establishment's transactions are mainly in United State Dollars (USD) and United Arab Emirates Dirhams (AED) that is pegged to AED.

b. Credit risk

Credit risk arises when a failure by counter parties to discharge their obligations could reduce the amount of future cash inflows from financial assets on hand at the end of the reporting period. The Company has no significant concentration of credit risk. Cash balance is held with high credit quality financial institutions and the Company has policies to limit the amount of credit exposure to any financial institution.

The following table details the risk profile of trade receivables based on the Company's provision matrix. As the Company's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Company's different customer base:

The maximum exposure to credit risk at the end of the reporting year was:

Due from related parties	2,491	-
Cash and bank balances	9,832,188	9,415,973
	11,526,742	10,405,805

Credit risks related to trade receivables are managed subject to the Company's policy, procedures and control relating to customer credit risk management. Credit limits are established by management for all customers based on internal assessment of the credit quality of customers. Outstanding trade receivables are regularly monitored. The requirement for impairment is analyzed at each reporting date on an individual basis.

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company, and arises principally from the Company's trade and other receivables, due from related parties and bank balances. The Company controls credit risk by monitoring credit exposures, limiting transactions with specific counterparties and assessing creditworthiness of counterparties on a routine and regular basis.

The Company's bank account are placed with high credit quality financial institution. The Company manages credit risk with respect to receivables from customers by monitoring in accordance with defined policies and procedures. Credit risk is limited to the carrying value of financial assets in the balance sheet.

The Company's current credit risk grading framework comprises the following categories:

Category	Description	Basis for recognizing expected credit losses
Performing	The counterparty has a low risk of default and does not have any past-due amount	12 month ECL
Doubtful	Amount is more than 90 days past due or there has been a significant increase in credit risk since initial recognition	
In default	Amount is more than 365 days past due or there is evidence indicating the asset is credit-impaired	
Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the Establishment has no realistic prospect of recovery.	

The Company writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or when the trade receivables are over two years past due, whichever occurs earlier. None of the trade receivables that have been written off is subject to enforcement activities.

Management believes that the concentration of credit risk is mitigated by high credit worthiness and financial stability of its customer.

Trade and other receivables, amounts due from related parties and balances with banks are not secured by any collateral. The amount that best represents maximum credit risk exposure on financial assets at the end of the reporting period, in the event counterparties fail to perform their obligations generally approximates their carrying value.

The tables below detail the credit quality of the Company's financial assets as well as the Company's maximum exposure to credit risk:

				(Figures in USD)
March 31, 2024	12-month or lifetime ECL	Gross carrying amount	Loss allowance	Net carrying amount
Accounts receivable	12-month ECL	630,756	(597,189)	33,567
Deposits, prepayments and		750,938	-	750,938
other receivable	12-month ECL			
Cash and bank balances	12-month ECL	9,832,188	-	9,832,188
Due from related parties	12-month ECL	2,491	-	2,491
		11,216,374		10,619,184

				Figures in USD)
March 31, 2023	12-month or lifetime ECL	Gross carrying amount	Loss allowance	Net carrying amount
Accounts receivable	12-month ECL	609,289	(597,189)	12,100
Deposits, prepayments and	12-month ECL	644,667	-	644,667
Cash and bank	12-month ECL	9,415,973		9,415,973
		10,669,929	-	10,669,929

Concentration of credit risk arises when a number of counter-parties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentration of credit risk indicates the relative sensitivity of the Company's performance to developments affecting a particular industry or geographic location. Management believes that the concentration of credit risk is mitigated by high credit worthiness and financial stability of its customer.

c. Interest rate risk

Interest rate risk is the risk that the value of financial instrument will fluctuate due to change in market interest rates. The Establishment is not exposed to any significant interest rate risk as the interest rates are fixed on the borrowings.

d. Liquidity risk

Liquidity risk is the risk that an enterprise will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from inability to sell a financial asset quickly at close to its fair value. Liquidity risk is managed by monitoring on a regular basis that sufficient funds are available to meet any future commitments.

The following are the contractual maturities of financial liabilities, including estimated interest payments:

				(Figures in USD)

Due to related parties	-	-	-	-
	9,179,822	480,000		9,659,822

e. Capital risk management

The primary objective of the Establishment's capital management is to ensure that it is able maintain a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder's value.

The Establishment manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Establishment may return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the year ended March 31, 2024 and March 31, 2023 respectively.

24. SIGNIFICANT EVENTS OCCURRING AFTER THE REPORTING DATE

There are no significant events occurring after the reporting date, which require disclosure in the financial statements.

25. RELATED PARTY TRANSACTIONS

The Establishment in the normal course of business enters into transactions with other business enterprises that fall within the definition of Related Party contained in the International Accounting Standard. The Establishment believes that the terms of these transactions are not significantly different from those that could have been obtained from third parties.

List of related parties and the nature of relationship is given below:

Name of related	Nature of relationship	
party	Mature of relationship	
Seamec Limited, India	Parent Entity	
Seamate Shipping FZC	Subsidiary	
HAL Offshore Limited	Ultimate Holding Entity	

Transactions with the related parties during the year are as follows:

(Figures in USD) Name of the **Nature of Transactions** 2024 (USD) 2023 (USD) related party Purchase of Vessel Gallent & Inventories 8,478,086 Seamec Limited, Interest on Payables 662,959 India Finance guarantee fee 3,771 Seamate Shipping Interest Income (11,331)Dividend Income (120,000)(120,000)**Seamate Shipping** 1,752,500 Loan repaid FZC Seamate Shipping Other advances received 156,000 234,000 FZC **HAL Offshore** 2,491 Reimbursement of expenses Limited

Balances due from/(due to) related parties at the year end is below:

HAL Offshore Limited	Due from the subsidiary	2,491	-
Seamate Shipping FZC	Advances	77,705	233,704

26. FAIR VALUES OF FINANCIAL INSTRUMENTS

Financial instruments comprise financial assets and financial liabilities.

The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The fair values of financial instruments are not materially different from their carrying values.

The table below presents assets and liabilities measured and carried at fair value and classified by quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).

The carrying values of the financial instruments by categories is as follows:

(Figures in USD)

	Carrying an	Carrying amount as at	
	March 31,	March 31,	
	2024	2023	
FINANCIAL ASSETS			
Financial assets measured at amortised cost

FINANCIAL LIABILITIES			
Financial liabilities measured at amortised cost			
Bank borrowings - short term	8,776,344	8,656,456	
Accounts and other payable	2,473,740	518,510	
Due to related parties	9,141,045	-	
Total	20,391,128	9,174,966	

Fair value hierarchy

IFRS establishes a fair value hierarchy that priorities the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under Ind AS are described below:

Level 1 — inputs are based upon quoted prices (unadjusted) in active markets for identical assets or liabilities which are accessible as of the measurement date.

Level 2 — inputs are based upon quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active and model derived valuations for the asset or liability that are derived principally from or corroborated by market data for which the primary inputs are observable, including forward interest rates, yield curves, credit risk and exchange rates.

27. Balances with Accounts receivable and payable are subject to confirmation and reconciliation. Adjustments in this regard will be done as and when required which in view of the management is not material.

28. CONTINGENT LIABILITIES

As represented by the management, except for the ongoing commitments in the normal course of business against which no loss is expected, there are no other known contingent liabilities existing at the reporting date.

29. KEY SOURCES OF ESTIMATION UNCERTAINTY

a. Useful lives of property and equipment

The Establishment's management determines the estimated useful lives of its property and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. Management reviews the residual value and useful lives annually and future depreciation charge would be adjusted where the management believes the useful lives differ from previous estimates.

b. Fair value of financial instruments

When the fair value of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

c. Impairment of non-financial assets

An impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in arm's length transactions of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Establishment is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

30. GENERAL

- **30.1** Figures are converted from USD at the conversion factor of 1 USD = 3.67 AED.
- **30.2** Previous year figures are regrouped and/ (or) reclassified, wherever necessary to confirm to current year financials.

INDEPENDENT AUDITOR'S REPORT

The Shareholders
Seamec International FZE
United Arab Emirates

Report on the audit of the consolidated financial statements of Seamec International FZE for the year ended March 31, 2024

Opinion

We have audited the accompanying consolidated financial statements of Seamec International FZE, Dubai, UAE and it's Subsidiary ("the Group"), which comprises the consolidated statement of financial position as at March 31, 2024, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as at March 31, 2024 and group financial performance and group's cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) for Small and Medium Sized Entities.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISA's). Our responsibilities under those standards are further described in the auditors responsibilities for the audit of the financial statements of our report. We are independent of the Group in accordance with the 'International Ethics Board for Accountants' Code of Ethics for Professional Accountants (the "IESBA Code") together with the ethical requirements that are relevant to our audit of the financial statements in the United Arab Emirates, and we have fulfilled our other Ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with IFRSs and in compliance with the applicable provisions of Dubai Airport Free Zone Authority (DAFZA), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the management is responsible for assessing the Group's ability to continue as a going concern, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditing Defaction Accounting Consulting Corporate Services Taxation

Seamec International FZE

INDEPENDENT AUDITOR'S REPORT

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors responsibilities for the audit of the financial statements

Objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA's will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISA's, we exercise professional judgement and maintain professional skepticism through out the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of
 expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Auditing • Accounting • Consulting Corporate Services • Taxation

Seamec International FZE

INDEPENDENT AUDITOR'S REPORT

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

We have obtained all the information and explanations which were necessary for the purpose of our audit and, to the best of our knowledge and belief, no violations of the Implementing Regulations issued there under by the Dubai Airport Free Zone Authority (DAFZA) came to our attention which would have had a material effect on the Group's financial position.

^{*}During the previous year 3 ordinary shares with par value of AED 1 Million (USD 817,439) each were issued

Annexed notes form an integral part of these financial statements. These financial statements are approved by Board of Directors.

For SEAMEC INTERNATIONAL FZE

S N Mohanty Director

May 25, 2024

These consolidated financial statements have been prepared for the year ended March 31, 2024

1. LEGAL STATUS, ACTIVITIES AND MANAGEMENT

1.1 Legal status

Seamec International FZE was registered on 14 March 2010 as a Free Zone Establishment with limited liability under license No. 1884 issued by Dubai Airport Free Zone Authority, Government of Dubai. The registered office of the Establishment is located in the Emirate of Dubai. The Establishment is a wholly owned subsidiary of Seamec Limited (the "Parent Establishment") registered in Mumbai, India. The ultimate parent Entity is Hal Offshore Limited (the Ultimate Parent Company), registered in New Delhi, India.

As per the Memorandum of Association: the issued, subscribed and paid up capital of the Establishment as on March 31, 2024 is AED 6,000,000 (AED Six Million Only) (Equivalent USD 1,634,878) divided into 6 shares of AED 1,000,000 each & as on March 31, 2023 is AED 6,000,000 (AED Six Million Only) (Equivalent USD 1,634,878) divided into 6 shares of AED 1,000,000 each held by Seamac Limited, India.

Subsidiary Company

Seamate Shipping FZC is a free zone Company registered in Emirate of Ajman, United Arab Emirates established on 09/09/2020.

The principal activity of the Company is "Ship Management and operation".

The share capital of the Company is AED 10,000 divided in to 10 shares of AED 1,000 each.

The Company has two shareholders with the following shareholding patten:

Shareholders	Number of	AED	USD	Percentage
	shares			of shares
Seamec International FZE	6	6,000	1,633	60%
Arete Shipping DMCC	4_	4,000	1,090	40%
	10	10,000	2,723	100%

1.2 Activities

The principal activities of the Establishment is "Ship Charter, Ship Management & Operation, Shipping Lines of Freight & Passengers Transportation, Onshore & Offshore Oil & gas field services".

1.3 The day to day activities of the Establishment are overseen by Mr Rone Anand Manapuzha, UK National holding Passport No:L4527057.

2 MATERIAL ACCOUNTING POLICIES

2.1 Basis of preparation

The consolidated financial statements incorporate the financial statements of the entities controlled by the Group as mentioned in point 1. Control is achieved where the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards for Small and Medium Sized Entities promulgated by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee (IFRS IC).

These consolidated financial statements comprise financial statements of the holding entity and subsidiary on a line-by-line basis by adding together the book values of items like assets, liabilities, income and expenses, after fully eliminating intra-Group balances and intra-Group transactions.

The consolidated financial statements are prepared under the historical cost convention.

2.2 Adoption of new and revised international financial reporting standards (IFRS)

(i) New Standards, Improvements, Interpretations and Amendments issued and effective for current year.

IFRS 17 Insurance Contracts (including the June 2020 and December 2021 Amendments to IFRS 17)

The Company has adopted IFRS 17 and the related amendments for the first time in the current year. IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 Insurance Contracts. IFRS 17 outlines a general model, which is modified for insurance contracts with direct participation features, described as the variable fee approach. The general model is simplified if certain criteria are met by measuring the liability for remaining coverage using the premium allocation approach. The general model uses current assumptions to estimate the amount, timing and uncertainty of future cash flows and it explicitly measures the cost of that uncertainty. It takes into account market interest rates and the impact of policyholders' options and guarantees.

Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors—Definition of Accounting Estimates

The Company has adopted the amendments to IAS 8 for the first time in the current year. The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". The definition of a change in accounting estimates was deleted

Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements—Disclosure of Accounting Policies

The Company has adopted the amendments to IAS 1 for the first time in the current year. The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'.

Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material. The IASB has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2.

Amendments to IAS 12 Income Taxes—Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The Company has adopted the amendments to IAS 12 for the first time in the current year. The amendments introduce a further exception from the initial recognition exemption. Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences. Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting profit nor taxable profit. Following the amendments to IAS 12, an entity is required to recognise the related deferred tax asset and liability, with the recognition of any deferred tax asset being subject to the recoverability criteria in IAS 12.

Amendments to IAS 12 Income Taxes—International Tax Reform Pillar—Two Model Rules

The Company has adopted the amendments to IAS 12 for the first time in the current year. The IASB amends the scope of IAS 12 to clarify that the Standard applies to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the OECD, including tax law that implements qualified domestic minimum top-up taxes described in those rule

The amendments introduce a temporary exception to the accounting requirements for deferred taxes in IAS 12, so that an entity would neither recognise nor disclose information about deferred tax assets and liabilities related to Pillar Two income taxes. Following the amendments, the Company is required to disclose that it has applied the exception and to disclose separately its current tax expense (income) related to Pillar Two income taxes.

(ii) New Standards, Improvements, Interpretations and Amendments issued but not yet effective.

Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture. The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted. The directors of the parent company anticipate that the application of these amendments may have an impact on the Company's consolidated financial statements in future periods should such transactions arise.

Amendments to IAS 1 Presentation of Financial Statements—Classification of Liabilities as Current or Non-current

The amendments to IAS 1 published in January 2020 affect only the presentation of liabilities as current or noncurrent in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items. The amendments clarify that the classification of liabilities as current or noncurrent is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services. The amendments are applied retrospectively for annual periods beginning on or after 1 January 2024, with early application permitted. The IASB has aligned the effective date with the 2022 amendments to IAS 1. If an entity applies the 2020 amendments for an earlier period, it is also required to apply the 2022 amendments early. The directors of the parent company anticipate that the application of these amendments may have an impact on the Company's consolidated financial statements in future periods.

2.3 Use of estimates and judgements

The preparation of the financial statements in conformity with IFRS requires management to make estimates and assumptions that may affect the reported amounts of assets and liabilities, revenues, expenses, disclosure of contingent liabilities and the resultant provisions and fair values. Such estimates are necessarily based on assumptions about several factors and actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

In particular, information about significant areas of estimation, uncertainty, and critical judgements in applying accounting policies (that have the most significant effect on the amount recognized in the financial statements) are discussed in remaining notes.

Performance review

For the year, the Group has recorded a revenue of USD 6.15 million as compared to the previous year revenue of USD 4.42 million. The net loss of the Group for the year is USD 3.94 million as compared to the net loss of USD 0.88 million for the previous year.

2.4 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of consideration received or receivable, excluding discounts, rebates, and sales taxes or duty. Revenue is recognized. Revenue is recognized when the performance obligations are met as per the requirement of IFRS 15. Revenue from contract with customers is recognized based on the application of a principle-based 'five step' model:

- a. Identification of the contract with customers
- Identification of performance obligations(PO)in the contract;
- c. Determination of the transaction price (TP);
- d. Allocation of the Transaction Price to the PO in the contract and
- e. Recognition of the revenue when (or as)an entity satisfies a PO

Revenue flowing from multiple services are categorized on the basis of timings of services provided and performance obligation so satisfied i.e. (a) At a point in time and (b) Over the period of time and is recognised to the extent that it is probable that the economic benefits will flow to the Branch and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, excluding any variable consideration unless it is highly probable that subsequent change in estimate would not result in reversal of revenue. Following are the major types of services provided along with their performance obligation satisfaction criteria:

Charter hire revenue

Charter hire revenues represent time charters and are recorded over the term of the charter as the services are provided. Revenue in progress at year end is calculated using the daily charter hire rate multiplied by the number of voyage days on-hire through year end. Respective vessel operating expenses are accounted for on an accrual basis.

Interest income

Interest income is recognised using the effective interest method.

2.5 Property and equipment

Property and equipment is stated at cost less accumulated depreciation and impairment losses, if any.

Depreciation is calculated on a straight line basis over the estimated useful lives of the assets.

Asset	Useful life of asset
Vessel	25 years
Vehicle	4 years
Furniture and fixtures	4 years
Computer and office equipment	4 years
Drydock expenditure	5 Years
Water treatment system	12.40 Years

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount, being the higher of their fair value less costs to sell and their value in use.

Expenditure incurred to replace a component of an item of property and equipment that is accounted for separately is capitalized and the carrying amount of the component that is replaced is written off. Other subsequent expenditure is capitalized only when it increases future economic benefits of the related item of property and equipment. All other expenditure is recognized in the statement of comprehensive income as the expense is incurred.

An item of property and equipment is derecognized upon disposal or when no future benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and carrying amount of the asset) is included in the statement of comprehensive income in the period the asset is derecognized.

The asset's residual values, useful lives and methods of depreciation are reviewed at each financial period end, and adjusted prospectively, if appropriate.

The cost of docking the vessel for maintenance and overhaul is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Group, and its cost can be measured reliably.

Costs incurred for preparation of vessel to go for Dry Docking is recognised as Capital Work In Progress and is subsequently capitalised when vessel goes for Dry Dock.

2.6 Non-current assets held for sale and discontinued operations

Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying value and fair value less costs to sell. Assets and disposal groups are classified as held for sale if their carrying value will be recovered through a sale transaction rather than through continuing use. This condition is only met when the sale is highly probable and the asset, or disposal group, is available for immediate sale in its present condition and is marketed for sale at a price that is reasonable in relation to its current fair value. The Company must also be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Where a disposal group represents a separate major line of business or geographical area of operations, or is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations, then it is treated as a discontinued operation. The post-tax profit or loss of the discontinued operation together with the gain or loss recognised on its disposal are disclosed as a single amount in the statement of profit and loss, with all prior periods being presented on this basis.

2.7 Investment in subsidiary

Investment where the Group holds more than 50% of the share capital of the investee and/or has the power to govern the financial and operating policies of the investee Company, so as to obtain benefits from its activities, are treated as subsidiary companies.

The Group's investment in subsidiary are accounted for using the equity method. Under the equity method, the investment in the subsidiary is initially recognised at cost are adjusted by incorporating the financial statement of the subsidiary Company as per the IFRS.

2.8 Accounts receivable

Accounts receivable are stated at original invoice amount less a provision for any uncollectible amounts. An estimate credit loss calculated using the simplified approach as per the requirements of IFRS 9. Bad debts are written off when there is no possibility of recovery.

2.9 Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash in hand, bank balances, and short-term deposits with an original maturity of three months or less.

2.10 Accounts payable and accruals

Liabilities are recognized for amounts to be paid in the future for goods or services received, whether billed by the supplier or not.

2.11 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement.

2.12 Employees' end of service benefits

The Group provides end of service benefits to its expatriate employees. The entitlement to these benefits is based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

2.13 Foreign currencies

Transactions in foreign currencies are initially recorded by the Group at the currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange at the reporting date. All differences arising on settlement or translation of monetary items are taken to the statement of comprehensive income. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

The gain or loss arising on retranslation of non-monetary items is treated in line with the recognition of gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in other comprehensive income or profit or loss is also recognized in other comprehensive income or profit or loss, respectively).

2.14 Financial assets

Initial recognition and subsequent measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- a). Financial assets at amortized cost (debt instruments);
- b). Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments);
- c). Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments); and
- d). Financial assets at fair value through profit or loss.

(a) Financial assets at fair value through OCI (debt instruments)

The Group measures debt instruments at fair value through OCI if both of the following conditions are met:

- a). The financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling; and
- b). The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the statement of profit or loss and computed in the same manner as for financial assets measured at amortized cost. The remaining fair value changes are recognized in OCI. Upon derecognition, the cumulative fair value change recognized in OCI is recycled to profit or loss.

The Group's debt instruments at fair value through OCI includes investments in quoted debt instruments included under other non-current financial assets.

(b) Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under IAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

(c) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognized in the statement of profit or loss.

(d) Financial assets at amortized cost (debt instruments)

The Group measures financial assets at amortized cost if both of the following conditions are met:

- a). The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- b). The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

(e) Derecognition of financial assets

A financial asset is primarily derecognized when:

- I). The rights to receive cash flows from the asset have expired; Or
- II). The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

(f) Impairment of financial assets

The Group recognizes an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For debt instruments at fair value through OCI, the Group applies the low credit risk simplification. At every reporting date, the Group evaluates whether the debt instrument is considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Group reassesses the internal credit rating of the debt instrument.

2.15 Financial liabilities

(a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

(b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Group has not designated any financial liability as at fair value through profit or loss.

Loans and borrowings

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profiter loss.

(c) Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

2.16 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

2.17 Value added tax

Value Added Tax (VAT) asset/ liability is recognized in the books on the basis of regulations defined by Federal Tax Authority (FTA).

Expenses and assets are recognized net of the amount of value added tax, except:

- i. When the value added tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the value added tax is recognized as part of the cost of acquisition of the asset or as part of the expense item, as applicable;
- ii. When receivables and payables are stated with the amount of value added tax included.

The net amount of value added tax recoverable from, or payable to, the taxation authority is included as part of other receivables or other payables in the financial statements.

2.18 Share capital

Proceeds from issuance of ordinary shares are recognized as share capital in equity. Incremental costs directly attributable to the issuance of ordinary shares are deducted against share capital.

2.19 Contingencies

A contingent liability is:

- (a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group: or
- (b) a present obligation that arises from past events but is not recognized because:
- (i) It is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
- (ii) The amount of the obligation cannot be measured with sufficient reliability.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group.

Contingent liabilities and assets are not recognized on the balance sheet of the Group, except for contingent liabilities assumed in a business combination that are present obligations and which the fair values can be reliably determined.

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the end of each reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

1. Seamec International FZE

Notes to the financial statements for the year ended March 31, 2024

The charter party agreement entered with White Hope Quay S.A. was terminated on December 17, 2020 and the charter deposit of USD 1,175,000 received from the charterer is adjusted with the outstanding receivable. The vessel, MV Good Hope was handed over to the Establishment. The Establishment has to receive USD 597,189 net off charter deposit from White Hope Quay S.A. and considering the recoverability, provision of USD 597,189 (P.Y. 298,595) is made for the due.

21. FINANCIAL INSTRUMENTS

The management believes that the fair value of the financial assets and liabilities are not significantly different from their carrying amounts at reporting date.

The management conducts and operates the business in a prudent manner, taking into account the significant risks to which the business is or could be exposed. The primary risks to which the business is exposed, comprise credit risks, liquidity risks and market risks (including currency risks, cash flow interest rate risks and fair value interest rate risks).

a. Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognized assets and liabilities are denominated in a currency that is not the Establishment's functional currency. The Establishment does not have any significant currency risk as the Establishment's transactions are mainly in United State Dollars (USD) and United Arab Emirates Dirhams (AED) that is pegged to AED.

b. Credit risk

Credit risk arises when a failure by counter parties to discharge their obligations could reduce the amount of future cash inflows from financial assets on hand at the end of the reporting period. The Company has no significant concentration of credit risk. Cash balance is held with high credit quality financial institutions and the Company has policies to limit the amount of credit exposure to any financial institution.

a. Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognized assets and liabilities are denominated in a currency that is not the Group's functional currency. The Group does not have any significant currency risk as the Group's transactions are mainly in United State Dollars (USD) and United Arab Emirates Dirhams (AED) that is pegged to AED.

b. Credit risk

Credit risk arises when a failure by counter parties to discharge their obligations could reduce the amount of future cash inflows from financial assets on hand at the end of the reporting period. The Company has no significant concentration of credit risk. Cash balance is held with high credit quality financial institutions and the Company has policies to limit the amount of credit exposure to any financial institution.

The following table details the risk profile of trade receivables based on the Company's provision matrix. As the Company's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Company's different customer base:

The maximum exposure to credit risk at the end of the reporting year was:

	(Figures in USD)	
	As on	As on
	Mar 31,2024	Mar 31,2023
Inventory	829,853	99,360
Deposits, prepayments and other receivable	811,843	681,445
Accounts receivable	119,138	12,100
Cash and bank balances	9,923,046	9,595,059
	11,683,880	10,387,964

Credit risks related to trade receivables are managed subject to the Group's policy, procedures and control relating to customer credit risk management. Credit limits are established by management for all customers based on internal assessment of the credit quality of customers. Outstanding trade receivables are regularly monitored. The requirement for impairment is analyzed at each reporting date on an individual basis.

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company, and arises principally from the Group's trade and other receivables, due from related parties and bank balances. The Group controls credit risk by monitoring credit exposures, limiting transactions with specific counterparties and assessing creditworthiness of counterparties on a routine and regular basis.

The Group's bank account are placed with high credit quality financial institution. The Group manages credit risk with respect to receivables from customers by monitoring in accordance with defined policies and procedures. Credit risk is limited to the carrying value of financial assets in the balance sheet.

The Group's current credit risk grading framework comprises the following categories:

Category	Description	12 month ECL
Performing	The counterparty has a low risk of	Lifetime ECL - not credit
	default and does not have any past-	impaired
	due amount	
Doubtful	Amount is more than 90 days past due	Lifetime ECL - credit-
	or there has been a significant	impaired
	increase in credit risk since initial	
	recognition	
In default	Amount is more than 365 days past	Lifetime ECL - credit-
	due or there is evidence indicating the asset is credit-impaired	impaired
Write-off	There is evidence indicating that the	Amount is written off
	debtor is in severe financial difficulty	
	and the Establishment has no realistic	
	prospect of recovery.	

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or when the trade receivables are over two years past due, whichever occurs earlier. None of the trade receivables that have been written off is subject to enforcement activities

Management believes that the concentration of credit risk is mitigated by high credit worthiness and financial stability of its customer.

Trade and other receivables, amounts due from related parties and balances with banks are not secured by any collateral. The amount that best represents maximum credit risk exposure on financial assets at the end of the reporting period, in the event counterparties fail to perform their obligations generally approximates their carrying value.

The tables below detail the credit quality of the Company's financial assets as well as the Company's maximum exposure to credit risk:

			(H	Figures in USD)
March 31, 2024	12-month or lifetime ECL	Gross carrying amount	Loss allowance	Net carrying amount
Accounts receivable		716,327	(597,189.1)	119,138
	12-month ECL			
Deposits,		811,843	-	811,843
prepayments and				
other receivable	12-month ECL			
Inventory	12-month ECL	829,853		829,853
		2,358,023		2,358,023
March 31, 2023	12-month or lifetime ECL	Gross carrying amount	Loss allowance	Net carrying amount
Accounts receivable		609,289	(597,189.1)	12,100
	12-month ECL			
Deposits,		681,445	-	681,445
Deposits, prepayments and		681,445	-	681,445
•	12-month ECL	681,445	-	681,445
prepayments and	12-month ECL 12-month ECL	681,445 <u>9</u> 9,360	- -	99,360

Concentration of credit risk arises when a number of counter-parties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentration of credit risk indicates the relative sensitivity of the Group's performance to developments affecting a particular industry or geographic location. Management believes that the concentration of credit risk is mitigated by high credit worthiness and financial stability of its customer.

c. Interest rate risk

Interest rate risk is the risk that the value of financial instrument will fluctuate due to change in market interest rates. The Group is not exposed to any significant interest rate risk as the interest rates are fixed on the borrowings.

d. Liquidity risk

Liquidity risk is the risk that an Group will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from inability to sell a financial asset quickly at close to its fair value. Liquidity risk is managed by monitoring on a regular basis that sufficient funds are available to meet any future commitments.

The following are the contractual maturities of financial liabilities, including estimated interest payments:

_				(Figures in USD)
	Less than	1 to 5 years	More than 5 years	Total

Due to related parties	-	-	-	-
	9,728,532	3,198,233		12,926,765

e. Capital risk management

The primary objective of the Group's capital management is to ensure that it is able maintain a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder's value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the year ended March 31, 2023 and March 31, 2022 respectively.

22. SIGNIFICANT EVENTS OCCURRING AFTER THE REPORTING DATE

There are no significant events occurring after the reporting date, which require disclosure in the financial statements.

HAL Offshore

Limited

Notes to the consolidated financial statements for the year ended March 31, 2024

23. RELATED PARTY TRANSACTIONS

The Group in the normal course of business enters into transactions with other business enterprises that fall within the definition of Related Party contained in the International Accounting Standard. The Group believes that the terms of these transactions are not significantly different from those that could have been obtained from third parties.

List of related parties and the nature of relationship is given below:

Name of related	Nature of relationship	
party		
Seamec Limited, India	Parent Entity	
Seamate Shipping FZC	Subsidiary	
HAL Offshore Limited	Ultimate Holding Entity

24. FAIR VALUES OF FINANCIAL INSTRUMENTS

Financial instruments comprise financial assets and financial liabilities.

The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The fair values of financial instruments are not materially different from their carrying values.

The table below presents assets and liabilities measured and carried at fair value and classified by quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).

The carrying values of the financial instruments by categories is as follows:

(Figures in USD)

	Carrying amount as at	
	March 31,	March 31,
	2024	2023
FINANCIAL ASSETS		
Financial assets measured at amortised cost		
Trade receivables	119,138	263,631
Cash and cash equivalents	9,923,046	9,525,959
Deposits, prepayments and other receivable	811,843	95,705
Inventory	829,853	98,349
Total	11,683,880	9,983,643
FINANCIAL LIABILITIES		
Financial liabilities measured at amortised cost		
Term loans - within one year	350,500	1,863,659
Bank borrowings - short term	8,776,344	3,072,307
Accounts and other payable	2,570,319	883,600
Due to related parties	9,141,045	6,081
Total	20,838,207	5,825,647

Fair value hierarchy

IFRS establishes a fair value hierarchy that priorities the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under Ind AS are described below:

Level 1 — inputs are based upon quoted prices (unadjusted) in active markets for identical assets or liabilities which are accessible as of the measurement date.

Level 2 — inputs are based upon quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active and model derived valuations for the asset or liability that are derived principally from or corroborated by market data for which the primary inputs are observable, including forward interest rates, yield curves, credit risk and exchange rates.

25. Balances with Accounts receivable and payable are subject to confirmation and reconciliation. Adjustments in this regard will be done as and when required which in view of the management is not material.

26. CONTINGENT LIABILITIES

As represented by the management, except for the ongoing commitments in the normal course of business against which no loss is expected, there are no other known contingent liabilities existing at the reporting date.

27. KEY SOURCES OF ESTIMATION UNCERTAINTY

a. Useful lives of property and equipment

The Group's management determines the estimated useful lives of its property and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. Management reviews the residual value and useful lives annually and future depreciation charge would be adjusted where the management believes the useful lives differ from previous estimates.

b. Fair value of financial instruments

When the fair value of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

c. Impairment of non-financial assets

An impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in arm's length transactions of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

Notes to the consolidated financial statements for the year ended March 31, 2024

28. GENERAL

- **28.1** Figures are converted from USD at the conversion factor of 1 USD = 3.67 AED.
- **28.2** Previous year figures are regrouped and/ (or) reclassified, wherever necessary to conform to current year financials.
