26. Overview of the entity's material responsible business conduct issues

Seamec's material issues were determined through a comprehensive process that involved stakeholder engagement and an analysis of our business environment. We began by identifying a probable set of issues common to our sector and geographic location.

These issues were then prioritized through a collaborative process involving our stakeholders and Seamec's senior management. We focused on those issues that were considered critically important from three perspectives: our stakeholders, our senior management, and the broader business context influenced by marco trends.

The result of this rigorous process was the identification of the material issues for our company. These issues, that we believe are most significant for Seamec's sustainability and long -term success, are given below with their relative position in the materiality map.

The material issues identified for Seamec are given below:

1. Water and effluents (E1)
2. GHG emissions and Air pollution (E2)
3. Human rights across value chain (S1)
4. Healthy and safety of employees (S2)
5. Equal opportunity and non - discrimination(S3)
6. Anti- corruption practices of the Company (G1)
7. Policies for ethical behaviour (G2)
8. Responsible policy advocacy (G3)

Among the identified material issues, 2 are environmental, 3 are social and 3 are governance related. social.

7. Statement by Director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements (listed entity has flexibility regarding the placement of this disclosure)

Seamec Limited remains steadfast in its commitment to environmental sustainability and social responsibility. Our objectives are guided by a robust Environment Management System (EMS), which involves identifying potential sources of environmental risks, evaluating their likelihood, and implementing necessary precautions to mitigate these risks effectively. This system ensures that our operations are aligned with the highest standards of environmental stewardship.

Seamec Limited has undertaken several projects aimed at reducing greenhouse gas emissions, including hull cleaning and painting, engine repairs and overhauling, thruster repairs and overhauling, and propeller repairs and polishing. These projects are integral to our strategy to enhance vessel efficiency, reduce fuel consumption, and minimize our environmental impact. Through these efforts, we demonstrate our dedication to creating a sustainable and environmentally responsible future.

Our new assets are compliant and certified as per the latest regulations, reinforcing our dedication to sustainable practices. We continue to adhere to the IMO 2020 regulations, which mandate the use of low-sulfur fuel, thereby ensuring cleaner shipping and cleaner air. In addition to transitioning to low-sulfur fuel, we have implemented several other initiatives to comply with these regulations, including ballast water management and the application of anti-fouling hull paint. These measures contribute significantly to reducing our environmental impact.

Furthermore, we utilize the Swachh Sagar Web Portal, which provides centralized port reception facilities for waste disposal, enhancing our waste management practices. Our commitment to reducing our carbon footprint and meeting the increasing standards set by the IMO is evident in our adoption of cleaner technologies being developed for the shipping industry.

In terms of social responsibility, we are proud to report that all our workers are unionized, ensuring that their rights and interests are effectively represented. We have also seen a significant improvement in the median remuneration of our employees, reflecting our commitment to fair and equitable compensation. Moreover, the amount of materials sourced directly from within the district and neighboring districts has doubled. This not only supports local economies but also reduces our transportation footprint, further contributing to our sustainability goals.

Our achievements this year underscore our ongoing commitment to ESG principles. We continue to strive for excellence in environmental management and social responsibility, ensuring that Seamec

Limited remains a leader in sustainable and responsible business practices. Through these efforts, we reaffirm our dedication to creating sustainable value for all our stakeholders while maintaining the highest standards of corporate governance and environmental stewardship.

- 2. Does the entity have processes in place to avoid/ manage conflict of interests involving members of the Board? (Yes/No) If Yes, provide details of the same.**

The Company has a code of conduct for board members which specifically talks about conflict of interest. The matters considered by the Board, if any Directors have any interest, they are refrained from participating in the discussion and decision thereof. The policy also covers the conflicts due to alternate employment, position of directorship in other companies, information confidentiality, investments, gift and hiring. The conflict of interest is derived based on the annual declaration and supplemental declaration(s), as and when occurs, made by the Directors of their interest under specific provisions of the Companies Act, 2013.

PRINCIPLE 2: Businesses should provide goods and services in a manner that is sustainable and safe
Essential Indicators

- 1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.**

	Current Financial Year	Previous Financial Year
R&D	-	-
Capex	95.98%	88.58%

At Seamec Limited, our commitment to environmental sustainability is reflected in our significant investments in upgrading our fleet. We have allocated ~96% of our total capital expenditure (capex) towards upgradation of our fleet which is aimed at improving the environmental and social impacts of our products and processes.

These include hull maintenance, engine efficiency, thruster functionality, and propeller performance. Through all these, we achieve:

- **Reduced Fuel Consumption:** Cleaner, more efficient vessels consume less fuel, lowering our overall carbon footprint.
- **Lower Emissions:** Enhanced vessel performance directly correlates with reduced emissions of greenhouse gases and pollutants.
- **Operational Efficiency:** Improved vessel speed and maneuverability lead to more efficient operations, further contributing to environmental benefits.

Below, we provide a detailed explanation of the activities undertaken through this upgradation process and their contributions to better environmental performance.

- 1. Hull Cleaning and Painting:**

- **Hull Cleaning:** Regular cleaning of the hull reduces the drag caused by marine growth, enabling the vessel to move more efficiently through the water. This results in lower fuel consumption and reduced greenhouse gas emissions.
- **Hull Painting:** Applying anti-fouling paint minimizes the growth of marine organisms on the hull. This not only maintains the vessel's speed and efficiency but also reduces the need for frequent cleaning, further lowering fuel use and emissions.

- 2. Engine Repairs and Overhauling:**

- **Upgrading and overhauling our vessel engines** ensure they operate at peak efficiency. Well-maintained engines consume less fuel and emit fewer pollutants and greenhouse gases. This maintenance extends the engines' operational life, decreasing the environmental impact associated with manufacturing and replacing engines.

- 3. Thruster Repairs and Overhauling:**

- **Thrusters are essential for maneuvering vessels, especially in ports and harbors.** Efficient thrusters reduce maneuvering time, leading to lower fuel consumption and emissions. Overhauling thrusters ensures they function smoothly and efficiently, enhancing overall vessel performance.

- 4. Propeller Repairs and Polishing:**

- **Maintaining and polishing propellers** reduces resistance and improves propulsion efficiency. This results in smoother and faster travel, which translates to better fuel efficiency and lower emissions. Regular propeller maintenance is crucial for optimizing the vessel's performance.

We believe that these measures are critical in supporting sustainable maritime operations and aligning

with global environmental standards.

By providing these detailed explanations, we aim to clarify the rationale behind our high capex investment and highlight our ongoing efforts to achieve superior environmental performance.

2 a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

No

b. If yes, what percentage of inputs were sourced sustainably?

Not Applicable

3 Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

Seamec maintains rigorous policies and procedures in place to ensure that all grievances are received and addressed effectively. This includes the Whistle Blower Policy and the Policy on Protection of Women against Sexual Harassment at the workplace.

Our whistle blower policy, as part of a larger Vigil Mechanism, provides a secure avenue for employees and other stakeholders to voice concerns over any irregularities, perceived misconduct, or unethical behaviour within the organization. This policy is designed to uphold our commitment to the highest standards of ethical, moral and legal conduct of business operations. Individuals raising such complaints are safeguarded against any form of retribution, providing them with the reassurance to speak up without fear of reprisal. In cases deemed appropriate and exceptional, provisions are made for direct access to the Chairperson of the “Audit Committee”, ensuring the highest level of scrutiny and impartiality.

In our ongoing effort to provide a safe and respectful work environment, we have also instituted the Policy of Protection of Women against Sexual Harassment at the workplace. An Internal Complaints Committee (ICC) has been established to handle and address any grievances related to sexual harassment. The ICC ensures that all complaints are addressed confidentially, promptly, and with utmost sensitivity. The process for submitting and resolving complaints through the ICC is clearly outlined in the policy, which is readily accessible on the website of the Company.

In all, these mechanisms reflect Seamec’s unwavering commitment to maintaining an open, transparent and respectful workplace where the concerns and well-being of our employees are treated as a priority.

12. Describe the measures taken by the entity to ensure a safe and healthy work place.

Seamec is deeply committed to ensuring the health and safety of its employees. Recognizing the potential hazards in the maritime sector, Seamec has established comprehensive safety management measures. This includes stringent adherence to the International Safety Management Code, which sets an international standard for the safe management and operation of ships. The company prides itself on maintaining a Document of Compliance and Safety Management Certificates, demonstrating its commitment to these standards.

In addition to these measures, Seamec conducts thorough risk assessments to ensure the safety of not only its ships and personnel but also the environment. Risk assessments are instrumental in identifying potential hazards, and the company takes proactive steps to establish appropriate safeguards, thereby minimizing the risk of injuries and ill-health.

Seamec believes in the importance of involving its employees in the development and implementation of their Occupational Health and Safety Management System. Employee participation is actively encouraged, as the company values the insights and experiences of its staff in making the workplace safer.

Furthermore, to ensure its employees receive timely and quality medical care in emergencies, Seamec provides group medical insurance coverage. This coverage underscores Seamec's commitment to the welfare of its employees, both on and off duty. While these measures form the core of Seamec's commitment to safety, the company is always looking for ways to improve and enhance its practices, ensuring that it remains at the forefront of safety and health in the maritime sector.

Leadership Indicators

- 1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board.**

The Company recognizes the significance of frequent and proactive interaction with its key stakeholders to communicate and improve its strategies and performance effectively. The company also conducted stakeholder engagement specifically to obtain their feedback on ESG issues. The information from this engagement is utilized by the board to arrive at strategies for Seamec. By maintaining ongoing engagement, the Company can enhance its understanding of stakeholder expectations and better meet their needs. The Board is kept apprised of relevant progress, and the Directors are solicited for their inputs as and when required.

- 2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes / No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity.**

Yes, the Company conducts materiality assessment through the stakeholder engagement process. The details related to the material topics identified are given in Section A, and the key stakeholders engaged with are elaborated within this chapter itself. The Company is constantly improving its strategies and processes as per the input of stakeholders. One such instance was the training & capacity building conducted for Seamec on human rights after the stakeholders had shown interest in the topic.

3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/ marginalized stakeholder groups.

The Company's Corporate Social Responsibility (CSR) activities are centered on supporting disadvantaged, vulnerable, and marginalized segments of society. More details on the initiatives and the outcomes are given in the principle 8 chapter and in the CSR section of the Annual Report.

Yes. Head HR/Supervisor

5. Describe the internal mechanisms in place to redress grievances related to human rights issues.

At Seamec, we prioritize the respect and protection of human rights. Our internal mechanisms for addressing grievances related to human rights issues are robust and comprehensive, and they include the following steps:

1. *Filing of Grievance:* Any employee who feels their human rights have been violated can make a formal, written complaint to their supervisor or the Human Resources (HR) department. This initiates the

grievance process, and confidentiality is maintained throughout.

2. *Investigation*: The HR department or supervisor then conducts a thorough investigation into the matter. This includes engaging with both the person who has lodged the complaint and the party against whom the complaint has been made, as well as any relevant witnesses or involved parties.

3. *Resolution Attempt*: The HR department or supervisor attempts to resolve the issue through dialogue and mutual agreement. This process respects the rights and dignity of all parties involved.

4. *Mediation*: If a satisfactory resolution is not reached, a neutral mediator may be brought in to facilitate further discussion. This mediator could be an internal or external party, depending on the nature of the grievance.

5. *Remedial Measures*: Based on the findings of the investigation and mediation process, the HR department, supervisor, or mediating authority may prescribe appropriate remedial measures or sanctions.

6. *Appeal*: If the aggrieved employee is not satisfied with the outcome, they have the right to escalate their grievance, potentially to a court of law. In addition to this process, we have specific policies in place to address particular forms of human rights violations:

- **Sexual Harassment Policy**: We have a dedicated committee that oversees and resolves any complaints related to sexual harassment in the workplace.
- **Vigil Mechanism and Whistle Blower Policy**: This policy is designed to address grievances regarding any suspected misconduct or irregularities within the company. In exceptional cases, employees can directly contact the Chairman of the Audit Committee.

We believe in fostering a work environment where human rights are respected and protected. We are committed to continually reviewing and improving our grievance redressal mechanisms to ensure they remain effective and responsive to our employees' needs.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

As a renowned maritime company, Seamec is fully committed to sustainable waste management practices that prioritize the health of our oceans and the planet. Our waste management strategy is meticulously designed and executed to ensure compliance with all applicable environmental regulations and standards.

The waste generated aboard our vessels is managed with utmost care, adhering to environmentally sound disposal methods. We employ a systematic, digitized approach to facilitate this process, utilizing the Swachh Bharat site, a government initiative promoting cleanliness and waste management in India.

Upon identifying the type and quantity of waste generated, we select the most suitable port and vendor listed on the Swachh Bharat site. This digital platform not only enables efficient waste tracking and disposal but also ensures transparency and accountability in our waste management practices. The chosen vendor is alerted in advance about the impending waste collection.

Upon the completion of waste collection, the vendor issues a certificate that substantiates the responsible handling and disposal of our waste. This certificate is uploaded onto the Swachh Bharat site for public records and a copy is retained on the vessel for our internal records.

In addition to managing waste, Seamec is dedicated to reducing the usage of hazardous and toxic chemicals in our operations. Our strategy includes prioritizing the use of environmentally friendly alternatives and implementing stringent controls on the usage of any potentially harmful substances.

When the use of hazardous or toxic chemicals is unavoidable, we have implemented robust practices to manage the associated waste responsibly. This includes the segregation of hazardous waste, specialized handling procedures, and ensuring disposal through certified vendors who are equipped to handle such waste.

Our commitment to environmental stewardship underlines all our operations at Seamec. We believe in conducting our business in a way that not only meets our service commitments but also contributes positively to the environment.
